EXPERIENCE

CI/CD Engineer

LoyaltyPlant

Dec 2022 – Ongoing

- Designed CI/CD architecture in Jenkins and GitLab CI
- Configured automated build and release pipelines for iOS and Android applications
- Scaled build infrastructure (on-premise/cloud agents, optimization, maintenance)
- Scripting experience in Python, Bash, and Ruby for automation and tooling
- Python development (tools, automation, integrations)

Jenkins, Gitlab CI, Python, Bash, Ruby

Python Developer + DevOps

Iqutor

Apr 2022 – Jan 2023

- Implemented CI/CD pipelines and Docker-based deployment
- Integrated and maintained Celery with RabbitMQ for task queues
- Optimized system architecture by introducing asynchronous workflows
- Managed containerized workloads using Kubernetes
- Backend development in Python (features, bug fixes, optimizations)
- Increased test coverage by 20
- Refactored legacy codebase, reducing technical debt and doubling feature delivery speed

Django, PostgreSQL, Docker, RabbitMQ, Celery, Gitlab CI

Intern Backend Developer

RobotBull Technologies

Oct 2021 – Dec 2021

- Internship in backend development using TypeScript and Nest.js, using Docker, Kubernetes, PostgreSQL and Minio (S3-compliant storage)

EDUCATION

Bachelor's degree,

Software Engineering

ITMO University

SKILLS

Programming Languages

Python

TypeScript

SQL

Frameworks

Django

Flask

SQLAlchemy

Vue.js

Technologies

PostgreSQL

Celery

RabbitMQ

Minio

Redis

Tools

Docker

Docker Compose

Linux

Git

GitLab CI
