EXPERIENCE

Senior Support Engineer

MTS (Mobile TeleSystems)

Oct 2025 – Present

- Application-layer incident diagnostics: log analysis with ELK, metrics via Prometheus/Grafana, Linux system metrics
- Docker environment operations: container diagnostics, image builds, log analysis
- Monitoring and alerting configuration (Zabbix, Prometheus)
- Network troubleshooting: connectivity diagnostics (TCP/IP, DNS, VPN), port availability
- Database failure investigation: SQL queries, replication checks, queue diagnostics
- Automation scripts for API key issuance and account management

ELK, Prometheus, Grafana, Zabbix, Docker, Linux, Bash, SQL

CI/CD Engineer

LoyaltyPlant

Dec 2022 – Present

- Designed and implemented CI/CD pipeline architecture in Jenkins and GitLab CI
- Automated build and publishing workflows for iOS and Android applications
- Optimised and scaled build infrastructure (agents, caching, parallel jobs)
- Scripting in Python, Bash, and Ruby for automation and internal tooling

Jenkins, GitLab CI, Python, Bash, Ruby

System Administrator

LoyaltyPlant

May 2025 – Present

- Administration of Windows and Linux servers
- Deployment and maintenance of virtual infrastructure (Hyper-V, VMware ESXi)
- VPN and proxy server configuration and support
- Active Directory user and group management

Linux, Windows Server, Hyper-V, ESXi, Active Directory, VPN

Python Developer + DevOps

Iqutor

Apr 2022 – Jan 2023

- Implemented CI/CD pipelines and Docker-based deployment
- Integrated and configured message brokers: Kafka, RabbitMQ

EDUCATION

Bachelor's Degree,

Infocommunication Technologies

ITMO University

Graduated 2025

SKILLS

CI/CD & Automation

Jenkins GitLab CI Ansible Python
Bash Ruby

Containerisation & Orchestration

Docker Docker Compose Kubernetes

Monitoring & Observability

Prometheus Grafana Zabbix ELK Stack

Infrastructure

Linux Hyper-V VMware ESXi MikroTik
WireGuard VPN Active Directory

Languages & Frameworks

Python TypeScript SQL Django
Flask

Databases & Messaging

PostgreSQL RabbitMQ Kafka Celery
Redis

Tools

Git Wireshark MinIO

LANGUAGES

- English – C1 Advanced
- German – A2 Elementary
- Russian – Native

- Refactored monolithic architecture towards asynchronous interaction model
- Deployed and orchestrated microservices in Kubernetes
- Backend development in Python; increased test coverage by 20%
- Modernised legacy code, halving new-feature delivery time

Python, Django, Docker, Kubernetes, RabbitMQ, Kafka, Celery, Git-Lab CI, PostgreSQL

Intern Backend Developer (TypeScript)

RobotBull Technologies

📅 Oct 2021 – Dec 2021

- Backend development in TypeScript with Nest.js
- Containerisation with Docker and orchestration with Kubernetes
- PostgreSQL query design and optimisation
- File storage with MinIO (S3-compatible)

ABOUT

I enjoy bringing order to infrastructure and automating repetitive work. Reliability, security, and scalability are the principles that guide every solution I build.
